EXAMINER'S AMENDMENT

1.   An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory Scott Smith on 12/05/2005.

The application has been amended as follows:

- In claim 1, line 11; "create" has been changed to --corresponds to--.

- In claim 1, line 16 has been deleted.

- In claim 10, line 11; "create" has been changed to --corresponds to--.

- In claim 10, line 16 has been deleted.

Reasons for Allowance

2.   The following is an examiner's statement of reasons for allowance:

- With regard to independent claims 1 and 10; as the closest reference, the combination of Ikeda et al (US 6,115,213) and Harrison et al (US 2002/0135933) shows a disk drive including a gap collection, wherein the gap collection member is at most the boundary layer thickness; **but fails to** show that the gap collection member is at most three quarters of the boundary layer thickness.

- Applicant asserts that a significant reduction in disk surface mechanical fluttering results from reducing the air gap between stationary surfaces facing the disk surface to about the boundary layer thickness. The inventors have found that when the air gaps are approximately the boundary layer thickness, there is improved head positioning. When the air gaps are smaller fractions of the boundary layer thickness, there are further improvements in head positioning (p. 3, lines 20-25).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
